

# Environmental policy statement

As a market leading logistics company, including the manufacture and supply of Flexitanks and an owner and provider of ISO Tanks, we are committed to prevent pollution arising as a result of our activities and to protect the environment in which we live and work.

Through close contact with national regulations, industry regulators, trade associations and customers we are at the forefront of legislative developments. We will continue to develop our processes and working practices to meet, as a minimum standard, both our legal and social obligations.

We shall seek to continually improve our environmental performance, by setting objectives and targets combined with clear management programmes to minimise our impact on the environment.

The Group Environmental performance is monitored continually, through individual businesses, at board level and at site management meetings.

We guarantee that we will:

- Manufacture all our products to the relevant environmental standards.
- Minimise the use of resources.
- Assist with the recovery and recycling of materials, wherever practical, and environmentally beneficial to do so.
- Continue to be a responsible employer and good neighbour.
- Provide appropriate training and suitable information for employees.
- Maintain leadership in the development of new products and processes using recycled materials and support initiatives which benefit the environment.

Andrew Watson  
Chief Operating Officer
